The above discussion is provided for general information. They include: (1) Statements of Water Diversions and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

We have several pamphlets available. For more specific information concerning water rights, please contact an attorney or write to this office.

Statements of Water Diversions and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation, and (3) assists the State to determine if additional water is available for future appropriators.

A department right is required for use of water by riparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

An appropriate right is granted to waters "foreign" to the natural stream system. Appropriate rights can be granted by riparian land and for storage of water. Generally, appropriate rights may be exercised only when a stream from which originates in a different watershed, water previously stored by others, return to the stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return to the stream.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been served from the sources of supply by an intervening parcel without reservation of the riparian right to a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return to the stream.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.
